1. Purpose Of This Manual

This manual explains how staff members can use the Mileage Tracker application from the first login through daily mileage submission and support features.

The Mileage Tracker application is used to record mileage entries, upload paper mileage forms, review saved records, message admin, and access route tools from one secure portal. The goal is to keep mileage information organized, accurate, and easy for admin to review.

Recommended Use Use this manual when onboarding a new worker, testing the application with a staff member, or answering common questions about daily mileage submission.

Who Should Use This Manual

- Workers or field staff who need to submit daily mileage records.
- Admin users who need to explain how the worker portal works.
- New staff members testing the Mileage Tracker application for the first time.

Main Things You Can Do In The Application

- Log in or create an account using your email address.
- Submit a new mileage entry with date, vehicle, property, purpose, and odometer readings.
- Review saved mileage records for the selected month.
- Upload a scanned or photographed paper mileage sheet.
- Send messages to admin for questions, corrections, or support.
- Use the help assistant and route tools when needed.

2. Accessing The Mileage Tracker Application

Open the Mileage Tracker application using the official app link below. This is the link staff should use moving forward for testing and daily use.

Official Application Link <https://mileage.prosperpads.com>

Supported Devices

- Desktop or laptop computer for full-size viewing.

- Tablet or iPad for field-friendly access without a laptop.
- Mobile phone for quick mileage entry, paper uploads, and messaging while traveling.

Before You Start

- Use the email address assigned to you by the company or personal email address.
- Keep your password private and do not share your login with another worker.
- Use a stable internet connection when submitting entries or uploading files.
- Have your vehicle, property, purpose, and odometer readings ready before saving an entry.

3. Creating An Account And Logging In

Login and portal access screen.

When you open the app link, you will see the Mileage Tracker sign-in page. This page is used to log in, create an account, or request a password reset.

First-Time Account Creation

1. Open The App Link - Go to <https://mileage.prosperpads.com> using your browser.
2. Click Create Account - Use the Create Account option on the sign-in page.
3. Enter Your Information - Enter your name, email address, and password. Use the email address that admin expects you to use.
4. Verify Your Email - Check your email inbox and click the verification link. You may need to check spam or promotions if the email does not appear right away.
5. Log In Again - Return to the app and log in with your verified email address and password.

Logging In

1. Open the Mileage Tracker link.
2. Enter your email address.
3. Enter your password.
4. Click Log In.
5. After login, the app will direct you to the correct dashboard based on your role.

Forgot Password

If you cannot remember your password, click Forgot Password on the sign-in page. Enter your email address and follow the password reset email instructions. After resetting your password, return to the login page and sign in again.

Security Reminder Never forward verification or password reset emails to someone else. These links are connected to your account.

4. Worker Dashboard Overview

Worker dashboard overview with summary cards and quick actions.

After logging in, the worker dashboard opens. This is the main page for viewing your current month, mileage summary, quick actions, route tools, and recent records.

Field / Area	What To Do	Notes
Header Area	Shows the Mileage Tracker title, selected month, and logout option.	Use the month selector to view records for a specific month.
Welcome Card	Displays your name, role, selected month, and assigned/latest vehicle.	This confirms you are logged in under the correct worker profile.

Field / Area	What To Do	Notes
Summary Cards	Show total entries, total miles, and paper uploads.	Use these for a quick monthly status check.
Quick Actions	Open Add Mileage, Upload Sheet, View History, or Message Admin.	These are shortcuts to the most-used actions.
Route Tools	Search property addresses, cities, or destinations.	Results open in Google Maps in a new tab.
Need Help Button	Opens the Mileage Help Assistant.	Use this for quick guidance inside the app.

5. Navigation Menu And Main Features

The left-side navigation menu is available on desktop and tablet. On mobile, the menu is opened using the menu icon. Each item directs you to a specific part of the application.

Field / Area	What To Do	Notes
Overview	Returns you to the main dashboard.	Use this when you want to see summary cards and quick actions.
New Mileage Entry	Opens the mileage entry form.	Use this to submit a new daily trip record.
Mileage History	Shows saved mileage entries for the selected month.	Use this to review, edit, delete, or download entries.
Upload Paper Sheet	Opens the upload form for paper mileage sheets.	Use this if you need to upload a photo, PDF, or scan of a paper form.
Messages	Opens chat with admin.	Use this for corrections, mileage questions, or support requests.
Help	Shows guide information and route tools.	Use this if you need instructions or map search support.
Logout	Signs you out of the application.	Always log out when using a shared device.

Mobile Tip On a phone, use the menu icon to open features. After selecting a feature, the app should take you directly to that feature so you do not need to scroll through the full dashboard.

6. Adding A Mileage Entry

Use New Mileage Entry whenever you need to submit a daily trip or work-related mileage record.

The screenshot shows the 'New Mileage Entry' form in the Prosper Real Estate Mileage Tracker. The form is titled 'Add Mileage' and includes a sub-header 'Fill out the trip details below. Odometer numbers are grouped together so you can quickly review the mileage before saving.' The form is divided into several sections: 'Trip Details' (Date, Vehicle), 'Property' (Search by property code, street, house number, or city), 'Purpose' (Inspection, maintenance, showing, office errand...), and 'Odometer Details' (Start Odo, End Odo, Total Miles). A dark blue overlay at the bottom left reads 'STEP 3 Complete The Mileage Form Choose the property, vehicle, date, purpose, and odometer details.' The form also includes a 'Save Entry' button and a 'Need Help?' link.

New Mileage Entry form showing trip details and odometer fields.

The New Mileage Entry form is the most important worker feature. Complete each required field carefully before saving the entry.

Step-By-Step Mileage Entry Process

1. Open New Mileage Entry - Click New Mileage Entry from the left menu or from the dashboard quick actions.
2. Confirm The Date - Select the trip date. Make sure it matches the day the mileage was actually driven.
3. Select The Vehicle - Choose the vehicle used for the trip. If your assigned vehicle is missing or incorrect, message admin before submitting.
4. Select The Property - Search or select the property related to the trip. Use the property code, street, house number, or city if available.
5. Enter The Purpose - Describe the reason for the trip clearly, such as inspection, maintenance, showing, office errand, supply pickup, or other work-related travel.
6. Enter Odometer Readings - Enter the start odometer and end odometer. The app will calculate total miles automatically.
7. Review The Total Miles - Check that the calculated miles look correct before saving.
8. Click Save Entry - Save the entry only after confirming the details are accurate.

STEP 3
Complete The Mileage Form
 Choose the property, vehicle, date, purpose, and odometer details.

Property selection area inside the mileage form.

STEP 3
Complete The Mileage Form
 Choose the property, vehicle, date, purpose, and odometer details.

Odometer details and automatic total miles calculation.

Mileage Entry Field Guide

Field / Area	What To Do	Notes
Date	Choose the date of the trip.	Do not use today's date if the trip happened on a different day.

Field / Area	What To Do	Notes
Vehicle	Select the vehicle you used.	If the vehicle is not listed, contact admin.
Property	Select the property connected to the trip.	Use LIVEEC for Prosper Office-related work if instructed by admin.
Purpose	Explain why the trip happened.	Use enough detail so admin can understand the reason.
Start Odo	Enter the starting odometer number.	This may auto-fill from your last saved ending odometer if available.
End Odo	Enter the final odometer number.	End Odo should normally be higher than Start Odo.
Total Miles	Review the automatic calculation.	Total Miles = End Odo minus Start Odo.
Save Entry	Submit the completed mileage record.	The saved entry should appear in Mileage History.

PROSPER REAL ESTATE
MILEAGE TRACKER
New Mileage Entry

NEW ENTRY
Add Mileage

Fill out the trip details below. Odometer numbers are grouped together so you can quickly review the mileage before saving.

Trip Details
Choose the date, vehicle, property, and reason for the trip.

Date: 06/06/2026
Vehicle: Personal - John Old Test

Prosper Office Mileage Note
If this trip is related to Prosper Office work, select LIVEEC as the property. This helps assign the mileage correctly to Prosper Office.

Property
Search by property code, street, house number, or city.

Purpose
Inspection, maintenance, showing, office errand...

Odometer Details
Start Odometer is auto-filled from the last saved end odometer when available, but it is always editable.

Start Odo: 178
End Odo: 0
Total Miles: 0

STEP 4
Submit The Entry
Review the details and save the mileage entry.

Save Entry

Submitting the mileage entry after reviewing trip details.

Before Saving Always double-check the date, vehicle, property, purpose, and odometer readings. This reduces correction work for admin later.

7. Reviewing Mileage History

Mileage History showing saved entries for review.

Mileage History is where workers can review saved mileage entries for the selected month. This is useful for checking whether an entry was saved, correcting mistakes, or downloading records.

How To Review Saved Entries

1. Click Mileage History from the navigation menu.
2. Confirm the selected month in the month dropdown.
3. Review each row for date, vehicle, property, purpose, miles, and status.
4. Use Edit if a correction is needed and the app allows editing.
5. Use Delete only if the entry was submitted by mistake and should be removed.
6. Use Download CSV if you need an export of the selected month.

What To Check In Each Entry

- The date matches the actual work travel date.
- The correct vehicle is selected.
- The property is correct and recognizable.
- The purpose explains why the travel happened.
- The total miles look reasonable based on the trip.
- The status shows the record was saved or reviewed as expected.

Confirmation screen used in the tutorial after a mileage entry is submitted.

8. Uploading A Paper Mileage Sheet

The Upload Paper Sheet feature is used when a worker has a paper mileage form, scanned mileage document, receipt, or photo that needs admin review.

1. Click Upload Paper Sheet from the navigation menu.
2. Click Choose File.
3. Select the file from your computer or mobile phone.
4. Choose the mileage month connected to the upload.
5. Confirm your worker name is correct.
6. Add notes for admin if needed, such as "This is my May mileage sheet" or "One row needs review."
7. Click Upload Paper Sheet.

Accepted File Types The upload area accepts common image and document formats such as JPG, PNG, WEBP, and PDF. Keep the file clear and readable before uploading.

When To Use Paper Sheet Upload

- You completed a paper mileage form and need admin to review it.
- You have a receipt or backup document connected to mileage travel.
- You cannot enter all details manually yet, but need to submit documentation.
- Admin requested a copy of your paper mileage record.

9. Messaging Admin

The Messages feature lets workers communicate with admin inside the Mileage Tracker application. Use it for mileage questions, correction requests, missing details, or upload help.

How To Send A Message

1. Click Messages from the navigation menu.
2. Type your message in the message box.
3. Be specific about the issue or question.
4. Click the send button.
5. Wait for admin to respond in the chat area.

Good Message Examples

- "I need to correct my June 17 entry. The end odometer should be 125430."
- "I uploaded a paper sheet for June. Please review the second row."
- "My assigned vehicle is missing from the dropdown."
- "I am not sure which property to select for this trip."

Messaging Tip Include the date, property, vehicle, and entry details when asking for help. This helps admin find the correct record faster.

10. Using Help And Route Tools

The Help section and Need Help button provide quick support inside the app. The route tools are useful for looking up property addresses or common Central Wisconsin locations before starting a trip.

Need Help Assistant

- Click Need Help in the lower-right corner of the app.
- Use quick buttons such as Add Mileage, Upload Sheet, or Message Admin if they are available.
- Type a question into the assistant box if you need help using the app.
- Close the assistant when finished.

Route Tools

- Enter a property address, city, or destination in the search field.
- Click Open to launch the result in Google Maps in a new tab.
- Use quick location buttons such as Eau Claire, Wausau, or Chippewa Falls if needed.

Important Route tools are for convenience only. The mileage entry should still be based on the actual odometer readings entered by the worker.

11. Best Practices For Accurate Mileage Records

- Submit mileage entries as soon as possible after the trip.
- Use clear purpose descriptions instead of vague notes.
- Always confirm the correct property before saving.
- Use actual odometer readings whenever possible.
- Review Mileage History before the end of each month.
- Message admin immediately if an entry needs correction.
- Upload clear paper sheets and avoid blurry photos.
- Log out after using a shared or public device.

Recommended Purpose Examples

Field / Area	What To Do	Notes
Inspection	Property inspection, walkthrough, condition check.	Add the property name/code if needed.
Maintenance	Repair visit, maintenance check, vendor support.	Include what was checked or completed.
Showing	Property showing or leasing appointment.	Use the correct property.
Office Errand	Prosper Office-related errand or supply pickup.	Use the office property if instructed.
Admin Requested Trip	Travel requested by admin or manager.	Mention who requested it if useful.

12. Troubleshooting Guide

Field / Area	What To Do	Notes
Cannot Log In	Confirm email/password, check email verification, or use Forgot Password.	If the account is not verified, check your email inbox.
No Verification Email	Check spam/junk, wait a few minutes, then request again if available.	Ask admin if the email still does not arrive.
Wrong Dashboard	Log out and log back in after admin checks your role.	Admins should confirm role in Supabase if needed.
Vehicle Missing	Message admin with the vehicle name that should be assigned.	Do not choose a wrong vehicle just to submit quickly.
Property Missing	Search by code, street, house number, or city; message admin if missing.	Use notes to explain if needed.
Total Miles Looks Wrong	Check Start Odo and End Odo numbers.	End Odo should normally be higher than Start Odo.
Upload Not Working	Check file type and size; try a clearer image or PDF.	Use JPG/PNG/PDF when possible.

Field / Area	What To Do	Notes
Message Not Sending	Check internet connection and refresh the page.	Try again before contacting admin outside the app.

13. Quick Reference Checklist

Task	Checklist
First Login	Open app link, create account, verify email, log in.
Daily Mileage Entry	Date, vehicle, property, purpose, start odo, end odo, total miles, save.
Monthly Review	Open Mileage History, select month, review entries, download CSV if needed.
Paper Sheet Upload	Choose file, select month, add notes, upload.
Admin Support	Open Messages, describe issue clearly, send message.
Route Search	Use Route Tools to search an address or city before starting a trip.
Help	Open Need Help assistant or Help page for instructions.

Final Reminder The best mileage record is submitted on time, tied to the correct property, and supported by clear odometer readings and a clear purpose description.

Appendix: Staff Testing Script

Use this short script when testing the Mileage Tracker with a new worker or when recording a tutorial video.

1. Open <https://mileage.prosperpads.com>.
2. Create a test worker account and verify the email address.
3. Log in and confirm the dashboard shows the worker name correctly.
4. Open New Mileage Entry and submit one test mileage record.
5. Open Mileage History and confirm the saved entry appears.
6. Upload a sample paper sheet or test image.
7. Send a test message to admin.
8. Open Help and test the route search field.
9. Test the same flow on mobile or tablet.
10. Report any issue, missing vehicle, missing property, or confusing instruction to admin.
